

## Our Commitment

Buyequip provide disposal solutions for end-of-use and end-of-life electronic equipment across Australia. The core focus of our business is to provide our clients with secure and safe recycling services that minimise waste. People and the environment are what matter to us.

Buyequip is committed to continually improving to meet the needs and expectations of our clients, and to minimise our impact on the environment.

We do this by:

- Regularly setting and reviewing quality and environmental based objectives and targets.
- Monitoring our processes and performance to ensure we are meeting customer expectations, and preventing pollution by minimising waste and maximising the reuse or recovery of resources.
- Individually assessing each eWaste item for its market value, operability and condition to produce accurate reporting for our customers and best possible next-life decisions.
- Investigating downstream processors to ensure integrity of their services and where possible engage contractors certified with ISO 14001.
- Implementing, maintaining and measuring the effectiveness of environmental controls and Emergency Response Plans.
- Operating ethically and lawfully by maintaining compliance with statutory and regulatory requirements, including Australian and New Zealand Standard AS/NZS 5377.
- Investing in staff training and awareness activities to improve the competence of our staff.
